Unlock New Levels of Data Center Efficiency & Savings in Your Health System

with EGI Health & HPE High-Performance Data Center Solutions

Today's healthcare IT infrastructures are making rapid strides towards modernization—and as they advance, health systems must do the same. But with vast amounts of Electronic Health Records (EHR) and other sensitive data to securely store and assets to track and manage, health systems often struggle to achieve agility. They require a solution to lighten the burdensome task of efficiently managing their growing assets and resources.

With flexible Data Center solutions from EGI Health & HPE, your health system can keep patient data protected and highly-available while still lowering costs and achieving accurate consumption tracking. HPE Synergy solutions help to efficiently advance data center performance for health systems of all sizes.

Helping customers overcome maintenance management struggles and abilities with asset tracking through custom applications.

HPE Greenlake is a pay-as-you-go model that delivers data center capacity in flexible increments for significant cost-savings, accurate accounting and real-time storage tracking.

HPE Synergy helps infrastructure to scale up seamlessly doctors always have fast access to patient data and IT staff always has fast access to asset information helping clients function at optimal levels.

EGI Health, a specialty practice of Ergonomic Group (EGI), is dedicated to serving the unique technology requirements of the healthcare industry with:

- **30+ years** of real-world healthcare implementations
- **Partnerships with 13+** leading technology manufacturers
- A full range of health system solutions, from the **data center to the bedside**
- A **results-focused, service-centric** approach

Ergonomic
GROUP

Simplified Management. Advanced Performance. Lower Costs.

HPE GreenLake provides health systems like yours with full data center capacity when you need it—not all at once. By licensing only what you need to cut costs without sacrificing scalability, your health system can:

- **Enjoy substantial cost-savings with advanced capacity bulk purchasing for up to 12 months.**
- **Reduce data center maintenance needs and expenses.**
- **Recover all costs via total cost of provisioning capture.**
- **Enable provision tracking of projects, end-users and cost centers, and view summary reports for all data.**
- **Achieve Software ELA consolidation and full accounting of allocated licenses.**
- **Purchase additional equipment with seamless, automated re-stock order tracking.**

HPE GREENLAKE THE PERFECT PLATFORM FOR HEALTHCARE

HPE GreenLake is a perfect platform for healthy systems who operate in fast-paced, sensitive sectors where sensitive data are at play. The solution matches market demands for smarter healthcare, whilst simultaneously reducing overheads and environmental impact by creating a scalable system that can be turned up or down to exactly meet the current need

With EGI Health & HPE, data center solutions, the health system rapidly achieved:

- Real-time automated data storage tracking for 14 separate projects.
- Immediate provisioning, closing gaps between demand and availability.
- 100% accuracy on all monthly/quarterly true-up accounting exercises to date.
- Coverage of all up-front costs.
- Live data tracking for every GB sold and provisioned.

Seamlessly Optimize & Scale Your Health System's Data Center with EGI Health & HPE

EGI Health & HPE work together as one expert partner for all of your health system's technology needs, from the data center to the bedside. With flexible, scalable solutions built for today's changing technology landscape, like HPE Synergy, and GreenLake, health systems can rapidly achieve the efficiencies and cost-savings they need in order to deliver the high-quality care patients deserve.
