Securing Healthcare and Life Sciences Systems Against Risk and Disruption

Over the last year, 92% of healthcare organizations faced at least one cyberattack, up from 88% the previous year.* The threat is growing, and so are the stakes—especially with rising pressure to support remote access, manage device sprawl, protect cloud systems, and meet strict compliance standards.

With Cisco IT solutions like Duo, EGI Health helps your organization protect access, reduce risk, and support care delivery through:

- **Multi-Factor Authentication (MFA):** Get a more robust layer of security using mobile push, biometrics, or tokens, ensuring that only authorized users gain access.
- **Device Health Checks:** Stop initial threats by verifying device health before granting access, ensuring only compliant devices connect.
- **Single Sign-On (SSO):** Streamline access by allowing clinicians and staff to use one secure login for multiple applications—saving time and reducing frustration.
- **Custom Access Policies:** Tailor access controls based on user roles, device health, and location so the right people have the right access at the right time.
- **System Integration:** Enjoy seamless interoperability between EHRs and clinical systems like Epic, Citrix, and VMware.
- **Real-Time Visibility:** See who's accessing what, from where, and on what device, so you can respond faster to potential risks.

Cisco solutions offer:

- Stronger protection against breaches, credential theft, and ransomware
- Ongoing compliance with HIPAA, EPCS, and internal policies
- Better clinician and staff productivity due to fewer login delays and access roadblocks

About Ergonomic Group:

The Ergonomic Group, Inc. (EGI) is a privately held, woman-owned company with nearly 40 years of experience guiding clients to innovative solutions for their unique business challenges and requirements. Our industry-leading technology, services, and support enable our customers to maximize their performance, scalability, and efficiency—and ultimately, elevate their business to new heights.
